SUMMARY

Certificate IV qualified in Cyber Security, commencing a Bachelor of Information Technology (Computer Science) at QUT in 2027. Builds and documents security and infrastructure projects independently: an AWS cloud security plan, a red team incident response exercise, and a virtualised home lab with practical experience across Linux, networking, and scripting. Four years of customer-facing work in fast-paced, compliance-driven environments. Seeking part-time or casual IT work alongside study.

TECHNICAL SKILLS

Security & Networking: Kali Linux, Metasploit, Hydra, Wireshark, Nmap, Metasploitable 2, DVWA, TCP/IP, DNS, DHCP, firewall configuration, vulnerability assessment

Systems & Cloud: Proxmox VE, virtualisation, Linux (Debian/Ubuntu), Windows, AWS (EC2, VPC, CloudFormation, Application Load Balancer), networking hardware

Programming & Scripting: Python, Bash, TypeScript, JavaScript, SQL

Web & Tooling: React, Next.js, Tailwind CSS, PostgreSQL, Git and GitHub, Vercel, Cloudflare Pages

Professional: Technical documentation, incident reporting, stakeholder communication, escalation and triage

PROJECTS

Velo — Client Workflow SaaS / *Next.js, TypeScript, PostgreSQL, Stripe*

- Designing and building a full-stack workflow platform for Australian freelance developers, covering proposals, client approval flows, milestone tracking, invoicing with PDF export, and a client portal.
- Implemented role-based authentication with middleware route guards, Stripe payment integration, transactional email, file uploads, and an operator admin panel.
- Built on Next.js and TypeScript with a PostgreSQL backend, deployed on Vercel; currently in pre-launch with a public waitlist.

Incident Response Team Exercise — Red Team Lead / *Certificate IV in Cyber Security — team project*

- Led the red team in a six-person simulated incident response engagement for a fictional client, running attacks on an isolated Kali Linux and Metasploitable 2 lab network against an opposing blue team.
- Executed SSH brute force attacks using Hydra and reverse TCP payload attacks via Metasploit, documenting each step with evidence for blue team analysis.
- Authored the Project Charter, Rules of Engagement, and attack playbooks, and presented findings in a formal exercise debrief and closure report.

Cloud Security Plan — AWS Migration / *Certificate IV in Cyber Security — AWS, CloudFormation*

- Assessed a case study business's existing AWS environment defined in CloudFormation and designed a hardened upgrade adding a network firewall, application load balancer, multi-subnet architecture, and segmented security groups.
- Produced testing and migration, monitoring and maintenance, and cloud incident response plans, including a containment, eradication, and recovery matrix.

Virtualised Home Lab / *Proxmox VE, networking*

- Designed and built a self-hosted lab running Proxmox VE on refurbished enterprise hardware in a rack-mounted setup.
- Configured network segmentation and bridged connectivity to work around physical cabling constraints; used the lab as a safe environment for security testing and service hosting.

jaineel.dev — Personal Portfolio / *Next.js, TypeScript, Tailwind CSS*

- Designed and deployed a personal site hosting project write-ups and security scripts, built with Next.js 15 and TypeScript and deployed on Cloudflare Pages.

EXPERIENCE

Bartender, Pig N Whistle / *April 2022 – Present*

- Maintain compliance with liquor licensing and RSA obligations in a high-volume Brisbane venue, including refusal of service and incident documentation.
- Assess risk and de-escalate situations in real time, making judgement calls under pressure with limited information.

- Coordinate with team members across a busy service floor while handling cash and point of sale systems accurately.

Customer Service Team Member, Coles Supermarkets / *September 2021 – January 2022*

- Triaged customer and operational issues, resolving what could be handled on the spot and escalating the rest to the appropriate department.
- Worked to documented procedures in a fast-moving retail environment, prioritising competing tasks during peak trade.

Sales & Operations Assistant, KFC / *January 2021 – July 2021*

- Processed orders through point of sale and order management systems with accuracy under consistent time pressure.
- Followed standardised food safety and operational escalation procedures in a KPI-driven environment.

EDUCATION

Bachelor of Information Technology (Computer Science), Queensland University of Technology / *Commencing 2027*

22603VIC Certificate IV in Cyber Security, TAFE Queensland (South Bank) / *October 2025 – September 2026*

- Coursework across network security infrastructure, breach detection and incident response, penetration testing fundamentals, cloud security, risk management frameworks, and secure network design.

Queensland Certificate of Education, Balmoral State High School / *2021*

- Studies in Mathematics, English, Physics, Aerospace Systems, and Digital Solutions.

CERTIFICATIONS

- 22603VIC Certificate IV in Cyber Security — TAFE Queensland (completed September 2026)
- AVI30316 Certificate III in Aviation (Remote Pilot — Visual Line of Sight)
